DETAILED ACTION

Election/Restrictions

1. Claims 1-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Species I-V and VII-VIII, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5 and included claims 29-38 being readable to elected Species VI.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 4. Claims 29-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morita et al in view of Perkins et al.

Application/Control Number: 09/719,433

Art Unit: 1722

Morita et al teaches the claimed apparatus for molding a magnetic tape cassette (Col. 1, lines 10-12) with plastic, or resin, (Col. 1, lines 55), comprising of a fixed mold (6) and a movable mold (7), slidable cores (8-10) that are in contact surface with one another (Fig. 2, 3).

Page 3

Morita fails to teach a coarse surface and smooth surfaces.

In regards to the coarse work surface, this shape of the mold surface for producing a product is merely a change in shape. It would have been obvious to one of ordinary skill in the art to modify Morita with change of the surface to a coarse surface because it is a design choice for the shape of the product.

In regards to the smooth contact surface between the mold body and the core, Perkins teaches the contact between surfaces of a mold being smooth. This is to reduce drag on the parts during operation via polishing (Col. 2, lines 6-8). Thus, it would have been obvious to one of ordinary skill in the art to modify Morita with smooth surfaces between the contact surfaces as taught by Perkins because it would reduce the drag during operation and thereby reduce the wear of the parts.

In regards to cores being on one of the molds, Morita already teaches the cores on the movable mold part. It would have been merely a rearrangment of parts to place the cores on the fixed mold part instead and still retain the operation of having the core actuate from the respective mold.

Application/Control Number: 09/719,433

Art Unit: 1722

Conclusion

Page 4

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Uhlig, Wieder, Ando et al and Montgomery.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Emmanuel S. Luk whose telephone number is (703) 305-1558. The examiner can normally be reached on Monday through Friday 8 to 4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L. Walker can be reached on (703) 308-0457. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0651.
